The handsomest, most sanitary and most durable and efficient construction ever offered is the celebrated Opal Onyx Iceless Soda Fountains sold exclusively by the Bishop & Babcock Company, 192 East Washington street. An Ideal Floor.

For years architects, builders and owners have been looking for a composition floor material that might possess all the advantages of a stone floor with none of its faults or its high cost. Marble tiling and mosaic floors are not only expensive but require frequent repairing, while their numerous joints furnish receptacles for moisture and filth to accumulate. To meet the demand for a sanitary composition floor that can be laid in plastic form (like a cement floor—all in one piece) old German formulas have been advertised and experimented with in Chicago and elsewhere by various firms, but all have proven unsatisfactory for two reasons, to wit: Sawdust, fiber and other perishable and absorbent materials are used in their composition, while experience in mixing and laying the material is wholly lacking. Such floors will look well for a short time, but are bound to go to pieces. According to some of the best Chicago architects and property owners there is, however, one make of sanitary floors that will last and prove satisfactory, and that is the "Agatillo" floor laid by the Davis Sanitary Floor Company, an Illinois corporation with offices at 173 Washington street, Chicago. Their floors have been laid for many years and are always laid under a positive guaranty. Their floors do not absorb moisture or stains, adhere firmly to wood, concrete, etc., and can be laid over any old floor. For saloon, restaurant and brewery floors nothing can be so good. Besides being handsome, it is very easy to walk upon and never becomes slippery even when wet; also, it is very easily and quickly cleaned. It completely excludes vermin, creates no dust and is wholly sanitary. Many saloons, restaurants and clubs in Chicago have such floors, a list of which will be furnished by the company. Attention is called to their ad. on another page of this paper.
